Software Engineer III

 July 2024 - Present

 Bangalore

IG Infotech India Pvt. Ltd.

UI Developer

 Oct 2021 - June 2024

 Bangalore

Collabera Technologies

Software Developer

 Sep 2019 - July 2021

 Bangalore

Huawei Technologies

Automation Engineer

 Sep 2016 - Sep 2019

 Bangalore

Profile Summary

- Senior Software Engineer with 8+ years of total experience and 5+ years specializing in UI development, designing and building scalable, high-performance web applications and enterprise platforms.
- Strong expertise in React, TypeScript, JavaScript (ES6+), HTML5, and CSS3 with a focus on clean architecture and maintainable code.
- Deep knowledge of React ecosystem: Hooks, Redux, Context API, React Router, React Query, and micro-frontend architecture for modular, independently deployable components.
- Proven track record of delivering impactful solutions—reduced client onboarding timelines from 40 days to 3 days through optimized UI workflows and system integrations.
- Took ownership of features end-to-end—from understanding requirements to shipping reliable, maintainable code in production.
- Applied software engineering best practices: performance optimization (lazy loading, code splitting), reusable component design, and custom hooks for improved development velocity.
- Proficient in modern build tools (Webpack, Vite), testing frameworks (Jest, WebdriverIO), version control (Git, Bitbucket), and CI/CD workflows (Jenkins).
- Strong collaborator with cross-functional teams including product managers, designers, and backend engineers to deliver end-to-end solutions in Agile environments.
- Quick learner with demonstrated ownership mindset—consistently takes features from concept to production with focus on quality and reliability.

Axios

REST APIs

Refinitiv APIs

01 TSX Onboarding

July 2024 - Present

Developed intuitive UI flows and system integrations for US Innovation Economy onboarding, accelerating client activation from 40 days to 3 days.

Key Contributions:

- ▶ Developed and maintained scalable UI components for client onboarding workflows using micro-frontend architecture
- ▶ Implemented UI-driven process improvements that reduced onboarding timelines from 40 days to 3 days
- ▶ Worked extensively on accounts and documents management screens, ensuring seamless user experience and data accuracy
- ▶ Applied frontend performance optimizations including lazy loading, code splitting, and modular design patterns
- ▶ Integrated REST APIs and collaborated with cross-functional teams to deliver production-ready features
- ▶ Ensured UI reliability through debugging, performance tuning, and adherence to frontend best practices
- ▶ Owned and maintained Accounts and Documents management workflows, delivering feature enhancements, performing code reviews, and ensuring accurate and reliable data handling

02 Instrument Renovation System

Oct 2021 - June 2024

A robust and user-friendly platform for customizing, accessing, and managing financial instruments and configurations.

Key Contributions:

- ▶ Built user-friendly interfaces for configuring products and managing financial instruments, including create, update, and delete workflows
- ▶ Integrated and displayed futures and market data from Refinitiv APIs, with responsive UI and data visualizations
- ▶ Implemented powerful search and filtering capabilities to quickly locate specific instruments
- ▶ Provided clear user feedback and logging mechanisms to support debugging and improve overall user experience

03 Meeting Space

Sep 2019 - July 2021

React

HTML

CSS

Bootstrap

Git

Node

NPM

Webpack

Simplifies room booking and management. Easily reserve, track, and manage meeting spaces for efficient and organized collaboration.

Key Contributions:

- ▶ Developed and maintained the user interface with React, ensuring a user-friendly design
- ▶ Implemented data validation on the client-side to ensure data accuracy
- ▶ Provided user-friendly error messages
- ▶ Implemented state management for real-time updates on room availability and bookings
- ▶ Ensured a responsive design for a seamless user experience on various devices
- ▶ Collaborated with cross-functional teams for successful project delivery
- ▶ Created custom React hooks to enhance code modularity

04 Hongkong HKT

Sep 2016 - Sep 2019

WebdriverIO

JavaScript

Jira

SQL

Axios

A billing mediation platform encompassing data collection, distribution, and various modules like retail billing, interconnect settlement, fraud detection, and revenue assurance.

Key Contributions:

- ▶ Conducted manual End-to-End testing and participated in User Acceptance Testing
- ▶ Contributed to test plan and test case review meetings
- ▶ Developed automation scripts using WebdriverIO and Node based modules
- ▶ Maintained code and resources in GitHub for ongoing improvements
- ▶ Ensured regression testing by enhancing and running scripts
- ▶ Configured builds on Jenkins for Continuous Integration
- ▶ Assisted in defect tracking and resolution
